

# Shooting Incident Reconstruction Course

**(40-Hours CLEET Accredited #15-1172)**

**When:** April 11 - 15, 2016

8:00 AM – 5:00 PM

**Hosted by:** Round Rock Police Department

**Location: Round Rock Police Department**

2701 N Mays

Round Rock, TX 78664

Hotel and non-course information contact:

Scott Cheshire (scheshire@roundrocktexas.gov)

**Tuition Cost:** \$495.00 per student

**Enrollment deadline is April 08, 2016**

Class limit: 24

Discounts available for agencies sending  
3 or more participants to the same class

**Instructor:** Everett Baxter Jr.

Everett Baxter Jr Forensics, LLC

Each student will receive a Shooting Incident Reconstruction workbook.

**Items each student is required to bring:**

The students would need to bring a scientific calculator, calipers and a camera with a tripod. Hearing and eye protection will be required on days at the firing range.

## Course Description

The documentation of a shooting incident may allow for additional investigative information to be identified, such as the parameter of where the shooter and/or victim were at the time of the shooting. Students will use the techniques taught in the shooting incident documentation course to perform various exercises to collect the necessary documentation of the shooting incident, then will take this data and examine the data in an effort to reconstruct the incident.

This information, if properly documented may be used at a later date as part of a shooting incident documentation / reconstruction or complete crime scene reconstruction. A shooter may indicate they were in a particular location when they fired a shot or shots. Their information by initially indicate a self-defense or accidental situation. Simple examination of the bullet defects may seem consistent with such information; however the shooting incident reconstruction may prove differently. The students will learn the documentation required of each bullet defect within a shooting scene. The students will also be provided the scientific and mathematical tools necessary provide an analysis of the shooting incident.

## Course Content

This course will begin with a review of the proper documentation of a shooting incident. The information obtained from this documentation will be utilized in the course. Students will learn the mathematical and scientific principles associated with a shooting incident. The students will spend several days working on exercises associated with the mathematics. The students will also perform live fire exercises at a pistol range. Some of these exercises are designed to validate and verify the shooting incident mathematical principles are in fact accurate. The live fire exercises will included shooting a vehicle and windshields and glass.

The students will then examine and document bullet defects in the vehicle and glass.

## Instructor

Everett Baxter Jr. has an Associate Degree in Applied Science – EMS and a Bachelor's of Science in Chemistry. He has over 23 combined years in law enforcement. He is currently assigned to the Crime Scene Unit of the Oklahoma City Police Department. Mr. Baxter was previously employed with the Norman Police Department where he worked in the EMS and Patrol Divisions. Mr. Baxter has had specialized training in Crime Scene Investigations, Homicide Investigations, Basic Bloodstain Pattern Analysis, Advanced Bloodstain Pattern Analysis, Math and Physics for Bloodstain Pattern Analysis, Shooting Scene Reconstruction, Crime Scene Reconstruction, Forensic Mapping, Clandestine Grace Investigation, Infrared and UV Photography, Alternate Light Source applications, Strangulation Detection with A Forensic Light Source, Footwear Impression Photography, Digital Photography of Latent Fingerprints, Cold Case Investigations. Mr. Baxter currently teaches or has taught Crime Scene Investigations, Police Photography and other CSI related classes at the college level. Mr. Baxter has presented numerous lectures and seminars at conferences, educational groups and various civic groups. Mr. Baxter has been court qualified as an Expert in Crime Scene Investigations, Crime Scene Reconstruction, Bloodstain Pattern Analysis, Shooting Scene Reconstruction and 3D Sketches in both District Court and federal Court.

Mr. Baxter has written papers on the Effects of Cleaning Products on Bloodstains (co-authored), Alternate Light Source. Mr. Baxter has written the books the Complete Crime Scene Investigation Handbook and the Complete Crime Scene Investigation Workbook.
